1.0 Introduction

2.0 Diagrams

2.1 Data flow charts

2.2 Detailed screen layouts

2.3 Input / Output specifications

3.0 Database schema

3.1 Data dictionary

3.2 Entity relationship diagram

3.3 Fields names

3.4 Data types

4.0 Security model

4.1 Desired "level" of security

4.2 Secure transaction specifications

4.3 Business to business connections

5.0 Existing system integration specifications

5.1 Data synchronization

5.2 Data replication

5.3 Data warehousing

6.0 Graphic design specifications

6.1 Art work

6.2 Images

6.3 Icons

7.0 Hardware / Software requirements

7.1 Client specifications

- Operating system
- CPU, disk, RAM
- Screen resolution
- Web browsers versions
- Client side scripting

7.2 Server specifications

- Operating system
- Database servers
- Web servers
- CPU, disk, RAM
- Server side scripting

8.0 Network specifications

8.1 LAN

8.2 WAN

8.3 Wireless

8.4 Capacity plan

8.5 User/Hit counts

8.6 Band width requirements

8.7 Load balancing

9.0 Hosting Plan

9.1 Backup/Restore

9.2 Remote control maintenance

9.3 Disaster recovery

9.4 New version implementation specification

10.0 Platform specifications

10.1 Server Operating systems

10.2 Network protocols

10.3 Databases

10.4 Programming languages

10.5 Development Tools

11.0 Test plan

11.1 Version control

11.2 Release cycles

11.3 User acceptance testing

12.0 System Documentation

12.1 Customer user guide

12.2 Technical system

13.0 Delivery Schedule

14.0 Developer Signatures
